No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301) for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 85

NUMBER 1, MARCH, 1978

T. BIBRING AND J. BAXANDALL. Peptide Analysis by Isoelectric Focusing in Polyacrylamide Gels 1

CRAIG FISCHER, SHELDON P. ROTHENBERG, AND MARIA DA COSTA. Preparation of a Stable Folate–Sepharose Complex for Affinity Chromatography 15

LI-PEN CHAO. Spectrophotometric Determination of Choline Acetyltransferase in the Presence of Dithiothreitol 20

J. G. SCHILLER, A. K. CHEN, AND C. C. LIU. Determination of Phenol Concentrations by an Electrochemical System with Immobilized Tyrosinase 25

S. YAMADA, H. K. SCHNOES, AND H. F. DELUCA. Synthesis of 25-Hydroxy[23,24-^{3}H]vitamin D_3 34

V. V. SHMATCHENKO AND A. J. VARSHAVSKY. A Technique of Low-pH Gel Electrophoresis of Chromosomal Proteins Which Does Not Require Preliminary Removal of DNA 42

BADARUDDIN SHAIKH, NORBERT J. PONTZER, JORGE E. MOLINA, AND MORRIS I. KELSEY. Separation and Detection of uv-Absorbing Derivatives of Fecal Bile Acid Metabolites by High-Performance Liquid Chromatography 47

LAURANCE S. JOHNSTON AND FRANCIS C. NEUHAUS. Spin-Label Assay for Lysozyme 56

C. O. PAT PATTERSON, J. B. GLOVER, AND S. E. STEVENS, JR. A Controlled-Temperature Apparatus for Measurement of Hydrogen Peroxide Production ... 63

P. K. MACNICOL. Determination of Specific Radioactivity of Plant Amino Acids Using Dansylation 71

B. J. MORRISON AND R. A. FRANKLIN. A Rapid, Hygienic Method for the Preparation of Fecal Samples for Liquid Scintillation Counting 79

DENIS LEBEL, GUY G. POIRIER, AND ADRIEN R. BEAUDOIN. A Convenient Method for the ATPase Assay 86

W. T. COAKLEY AND C. J. JAMES. A Simple Linear Transform for the Folin–Lowry Protein Calibration Curve to 1.0 mg/ml 90

LEI YEN FAGER AND ROGER S. FAGER. Separation of Visual Pigments on Columns of Controlled-Pore Glass Beads 98

RIKIZO HORIKAWA, TAKENORI TANIMURA, AND ZENZO TAMURA. Fluorometric Determination of Δ^4-3-Ketosteroids Using Aluminum Salt and Isonicotinylhydrazine 105

PATRICK LAMBIN. Reliability of Molecular Weight Determination of Proteins by Polyacrylamide Gradient Gel Electrophoresis in the Presence of Sodium Dodecyl Sulfate 114

DAVID G. KLAPPER, CHARLES E. WILDE III, AND J. DONALD CAPRA. Automated Amino Acid Sequence of Small Peptides Utilizing Polybrene 126

RAY A. OLSSON, CHARLES J. DAVIS, MARY K. GENTRY, AND ROBERT B. VOMACKA. A Radioligand-Binding Assay for Adenosine in Tissue Extracts 132

KENNETH C. INGHAM AND RONALD C. LING. A Quantitative Assay for Poly(ethylene glycol) without Interference by Proteins 139

F. J. GONZALEZ, C. T. GARRETT, D. WIENER, AND M. D. CAINE. The Use of Potassium Iodide Equilibrium Density Gradient Centrifugation in the Purification of RNA for Hybridization with Nonreiterated DNA Sequences 146

L. J. BUCKLEY, Y. OSHIMA, AND Y. SHIMIZU. Construction of a Paralytic Shellfish Toxin Analyzer and Its Application 157

S. Tsuyoshi Ohnishi. Characterization of the Murexide Method: Dual-Wavelength Spectrophotometry of Cations under Physiological Conditions 165
Cristina Glad and Anders O. Grubb. Immunocapillarymigration—A New Method for Immunochemical Quantitation 180
W. B. Allington, A. L. Cordry, G. A. McCullough, D. E. Mitchell, and J. W. Nelson. Electrophoretic Concentration of Macromolecules 188
Shiro Ikawa. Group Separation of Bile Acids and Salts by Silicic Acid Column Chromatography 197
Alice G. McCormick, Helena Wachslicht, and Andreas Chrambach. Preparative Separation of Hemoglobins A and S by Gel Electrofocusing, Using Selective Zone Elution by Gel Transposition between Suitable Anolytes and Catholytes 209
Ronald E. Zimmerman. A Rapid Assay for Pectinesterase Activity Which Can be Used as a Prescreen for Pectinesterase Inhibitors 219
Britta Swebilius Singer, Hope Morrissett, and Larry Gold. An Electrofocusing System for the Analysis of Proteins and Their Genetic Variants 224
Robert E. Hurst, James Y.-p. Sheng, and Yoichiro Ito. Countercurrent Chromatography—A New Method for the Fractionation of Glycosaminoglycans 230
C. T. Huber, W. C. Duckworth, and S. S. Solomon. A Continuous Automated Assay of Lipolysis during Perifusion of Isolated Fat Cells 239
M. R. V. Murthy and A. D. Bharucha. Ultracentrifugation of Small Volumes of Tissue Extracts without the Use of Tube Adapters 251
Margaret A. Wilson, Joseph Cascarano, Wendy L. Wooten, and Cecil B. Pickett. Quantitative Isolation of Liver Mitochondria by Zonal Centrifugation 255
Marshall Phillips and Paul A. Rebers. Isopycnic Characterization of Lipopolysaccharides from *Pasteurella multocida* 265
M. D. Hatch. A Simple Spectrophotometric Assay for Fumarate Hydratase in Crude Tissue Extracts 271
Pi-wan Cheng and Thomas F. Boat. An Improved Method for the Determination of Galactosaminitol, Glucosaminitol, Glucosamine, and Galactosamine on an Amino Acid Analyzer 276

Short Communications

K. T. Koshy and A. L. VanDerSlik. Improvements in the High Performance Liquid Chromatographic Method for the Determination of 25-Hydroxycholecalciferol in Cow Plasma 283
Sai-Hung Yu and Thomas G. Spring. A Convenient Method for the Storage of Slab Gels 287
Ruggero Rossi. The Use of Preparative Electrophoresis as a Fractionation Procedure for Quantitative Mammalian DNA Analysis 291
Helen H. Hess, Marjorie B. Lees, and Julia E. Derr. A Linear Lowry–Folin Assay for Both Water-Soluble and Sodium Dodecyl Sulfate-Solubilized Proteins 295
András B. Benkö and Péter Keresztes. A Modified Orcinol Procedure for Simple Determination of Pseudouridine from Biological Fluids 301
Kunihiko Izumi. The 100-MHz Proton NMR Spectra of Phenylthiohydantoin Derivatives of Amino Acids 306
Peter F. Davison. Separation of Collagen Chains and Chain Fragments by Gel Filtration 311
B. E. Chidakel, L. B. Ellwein, and A. Chrambach. Controlled Deaeration of Polymerization Mixtures in Polyacrylamide Gel Electrophoresis 316

Ian T. Carney, Robert J. Beynon, John Kay, and Nigel Birket. A Semicontinuous Assay for Glycogen Phosphorylase 321
Arthur Dalby and A. Cornwell Shuman. Temperature-Induced Errors in the Colorimetric Determination of Tannins 325
Announcement 328

Number 2, April, 1978

Norman G. Anderson and N. Leigh Anderson. Analytical Techniques for Cell Fractions. XXI. Two-Dimensional Analysis of Serum and Tissue Proteins: Multiple Isoelectric Focusing 331
N. Leigh Anderson and Norman G. Anderson. Analytical Techniques for Cell Fractions. XXII. Two-Dimensional Analysis of Serum and Tissue Proteins: Multiple Gradient-Slab Gel Electrophoresis 341
R. Vrijsen and A. Boeyé. Gel Electrophoresis of Protein–Dodecyl Sulfate Complexes in a pH Gradient and Improved Resolution of Poliovirus Polypeptides 355
Thomas W. Kirby and Paul K. Warme. Application of a Partially Automated Solid-Phase Peptide Synthesis Apparatus to the Synthesis of a Protected Peptide Fragment of Cytochrome *c* 367
John F. O'Brien and Mark E. Emmerling. Estimation of Glycosaminoglycans by Atomic Absorption Determination of Copper in Their Alcian Blue Complexes 377
Masahiko Ogihara, Yukiko Tokumitsu, and Michio Ui. A Novel Radiochemical Method for the Microdetermination of Total and Individual Ketone Bodies in Biological Materials 387
Ralph Hinegardner and Janet Alderton. A New Approach to Microhomogenization 401
Alan R. Christopher, Madan L. Nagpal, Anthony R. Carroll, and Jay C. Brown. Chloramine T-Mediated Radioiodination of Proteins on Intact Polyacrylamide Slab Gels 404
Stuart E. Builder and Irwin H. Segel. Equilibrium Ligand Binding Assays Using Labeled Substrates: Nature of the Errors Introduced by Radiochemical Impurities 413
Yung-chi Cheng and Barbara Domin. Behavior of Various Ribo- and Deoxyribonucleosides, Nucleoside Monophosphate Kinases, and Nucleoside Diphosphokinase on Blue Sepharose Affinity Columns 425
A. Sanghvi, M. Galli Kienle, and G. Galli. A Rapid, Sensitive Method for Simultaneous Measurements of Tissue Levels of Oxygenated Derivatives of Cholesterol 430
Shyun-long Yun and Clarence H. Suelter. Spectrophotometric Determination of Bromopyruvate by Reaction with 2-Nitro-5-Thiobenzoic Acid 437
Thos. J. Muckle. Thymosulfonphthalein-Dependent Immunoelectrophoretic Dissociation of Serum Lipoproteins A-I and A-II 442
Arnold A. White and Dale B. Karr. Improved Two-Step Method for the Assay of Adenylate and Guanylate Cyclase 451
Örjan Wrange, Bo Nordenskjöld, and Jan-Åke Gustafsson. Cytosol Estradiol Receptor in Human Mammary Carcinoma: An Assay Based on Isoelectric Focusing in Polyacrylamide Gel 461

Antero Aitio. A Simple and Sensitive Assay of 7-Ethoxycoumarin Deethylation 488

JOANNE F. BERNSTEIN, LINDA S. CHAN, STANLEY P. AZEN, ENNIS C. LAYNE, AND PAUL J. GEIGER. Comparative Analysis of Chromatography Peaks by Computer and Disc-Integrator 492

NAAMA CARMEL AND ABRAHAM M. KONIJN. Quantitative Determination of Ferritin by Electroimmunoassay 499

GIOVANNI ROVERA, CLAUDETTE MAGARIAN, AND THADDEUS W. BORUN. Resolution of Hemoglobin Subunits by Electrophoresis in Acid Urea Polyacrylamide Gels Containing Triton X-100 506

MICHAEL A. GORDON, DONALD E. CARPENTER, HAROLD W. BARRETT, AND IRWIN B. WILSON. Determination of the Normality of Cholinesterase Solutions 519

KENNETH MOPPER. Improved Chromatographic Separations on Anion-Exchange Resins. I. Partition Chromatography of Sugars in Ethanol 528

PI-WAN CHENG AND DON M. CARLSON. Quantitative Enzymatic Synthesis of 2-Acetamido-2-deoxy-α-D-glucopyranosyl-1,6-diphosphate 533

J. JOHN MARSHALL. Quantitative Determination of α-Amylase in Glucoamylase Preparations 541

W. GAŁASIŃSKI, ANNA GADEK, ANNA RATKIEWICZ, AND W. RZECZYCKI. A Convenient Modification of the Method for Hydroxyproline Determination in Proteins 550

MARIJANA KOPUN AND MICHAEL HERSCHEL. Determination of Dopamine-β-Hydroxylase Activity by Means of Chromatogram–Spectrofluorometric Measurement in Remission 556

J. U. PRAUSE, H. SJÖSTRÖM, O. NORÉN, AND L. JOSEFSSON. A Micromodification of the Electroimmunoassay 564

CHRISTOPHER P. STOWELL, THERESA B. KUHLENSCHMIDT, AND CRAIG A. HOPPE. A Fluorescamine Assay for Submicrogram Quantities of Protein in the Presence of Triton X-100 572

J. V. SINGH, S. K. KHANNA, AND G. B. SINGH. Effect of Manganese on Ninhydrin Color Development by Amino Acids 581

M. W. KELLUM, B. ORAY, AND S. J. NORTON. A Convenient Quantitative Synthesis of Methylglyoxal for Glyoxalase I Assays 586

E. F. EASTIN. Total Nitrogen Determination for Plant Material Containing Nitrate 591

YASHWANT D. KARKHANIS, JOHANNA Y. ZELTNER, JESSE J. JACKSON, AND DENNIS J. CARLO. A New and Improved Microassay to Determine 2-Keto-3-deoxy-octonate in Lipopolysaccharide of Gram-Negative Bacteria 595

DAVID F. SMITH, DAVID A. ZOPF, AND VICTOR GINSBURG. Fractionation of Sialyl Oligosaccharides of Human Milk by Ion-Exchange Chromatography 602

SHORT COMMUNICATIONS

DALE E. GRAHAM. The Isolation of High Molecular Weight DNA from Whole Organisms or Large Tissue Masses 609

YOICHIRO ITO AND ROBERT L. BOWMAN. Countercurrent Chromatography with the Flow-through Centrifuge without Rotating Seals 614

AUTHOR INDEX FOR VOLUME 85 618

The Subject Index for Volume 85 will appear in the December 1978 issue as part of a cumulative index for the year 1978.

INFORMATION FOR AUTHORS

Analytical Biochemistry will publish articles of broad interest on qualitative and quantitative techniques based on chemical, physical, and biological principles; methods of preparation, purification, characterization, isolation, and separation of biological substances and related materials; and instrumentation.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Analytical Biochemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permittion to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Analytical Biochemistry, Editorial Office, 111 Fifth Avenue, New York, N. Y. 10003.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. At least three copies should be submitted, each copy to include all figures and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about 8½ × 11 inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), an abstract (50–150 words), and address to which proof should be mailed. Please number all pages of manuscript.

Authors are encouraged to use descriptive subheadings in this order: Abstract, Introductory statement (no heading), Methods, Results, Discussion, Acknowledgments, and References.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

Names of chemical or organic substances should follow the recommendations of the IUPAC–IUB Combined Commission on Biochemical Nomenclature (CBN) as published in the *Archives of Biochemistry and Biophysics* Information for Authors, appearing in the January issues of that journal.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for the engraver. A convenient size for drawings is 8½ × 11 inches (21 × 27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final engraving should be inked in black.

Photographs must be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet; in tables, by superscript letters and placed at bottom of page containing table.

References to the literature should be cited in the text by Arabic numerals in parentheses and listed at the end of the paper in consecutive order. Abbreviations of journal titles should

follow the style used in Chemical Abstracts' *Service Source Index* (1969 Edition). Please note style of capitalization and punctuation for journal articles and edited books in the following examples:

1. Chattoraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* **142,** 363–370.
2. Gottschalk, A. (1960) *in* The Enzymes (Boyer, R. D., Lardy, H. A., and Myrback, K., eds.), 2nd ed , Vol. 2, pp. 461–467, Academic Press, New York.
3. Meister, A. (1957) The Biochemistry of Amino Acids, p. 298, Academic Press, New York.

Proofs. Galley proofs will be sent to the authors with reprint order forms. Fifty reprints of each article are provided free of charge.
